University

Who (...or what) is to decide? What AI influence means for human decisions

Laura Crompton started her PhD at the University of Vienna in March 2019. She is currently working within the framework of the FWF funded project FoNTI (Forms of Normativity - Transitions and Intersections). Her work centres around the ontology and ethics of AI influence in human-AI interaction.

Laura's interest in Philosophy of Technology and Robot Ethics started very early in her bachelor's degree, when she started working on the EU project RoboLaw in 2013 as a research assistant at the LMU. Ever since, she has shown a growing interest in the dynamics of human agents interacting with technology. She has already held talks on Robot Ethics and Phronesis, Ethics of Human Enhancement, Autonomous Driving, and Ethics of AI. Within her PhD, Laura has now set her focus on human-AI interaction.

Workshop internazionale nell'ambito del progetto "AInCP. Clinical validation of Artificial Intelligence for providing a personalized motor clinical profile assessment and rehabilitation of upper limb in children with unilateral Cerebral Palsy". Coordinato dalla Dr. Giuseppina Sgandurra (Università di Pisa) e finanziato dalla Commissione Europea AInCP (GA 101057309).

Aula BP6 dell'edificio *Buon Pastore*. Il Seminario si svolgerà in modalità ibrida sul canale TEAMS del corso di Etica della comunicazione. Per partecipare <https://bit.ly/3Et3vba>
